- Full Touch Panel
- IP68 Waterproof
- Bluetooth Version 5.0
- Battery: 170mAh
- Power Input: DC 5V 170mA
- Weight: 40 grams

Product Features

1. Main Interface Design
Long press the screen on the main dial interface and then swipe left or right to select the interface and tap to confirm the dial. You can also change the dial through the App and switch the customized dial through the App.

2. Pedometer
The watch can record the number of steps taken every day. The walking step data can be synchronized to the App. The data can be viewed from the App. It includes the number of steps, distance, calories, etc, recorded in the watch end of the day. The data will be reset at 00:00 every day.

3. Sleeping Monitor
The user has to wear the watch so that their sleep pattern can be detected, i.e., the length of sleep, deep sleep and light sleep state. Adjusting your sleeping time according to the data's reference would improve your body's health index. The default sleep monitoring time is from 22:00 pm to 10:00 am. The sleeping data result of last night will be displayed after 10:00 am. The data can be synchronized to the App and the sleep data will include detailed information analysis and data record that can be viewed from the App.

4. Heart Rate Monitor
Once you tap on the Heart Rate Monitor Interface, the heart rate monitoring will start automatically after 2 seconds. The test data will be displayed when the measurement is completed. The heart rate monitoring data can be synchronized to the App and the detailed HR information analysis and the data record can be viewed from the App.
Note: Please maintain the correct posture while monitoring the heart rate. The measurement results are for reference only, can not be used as medical data.

5. Sports mode
Tap the sport mode icon to enter the multi-sport mode. Slide up and down to select one sport, tap to enter monitoring, and tap on the sports mode interface. Sport mode data can be synchronized to the App. The sport mode monitoring will give a detailed information analysis and data records can be viewed on the App.

6. Breath
Entering the breath training interface, you can choose the time and rhythm. For example, selecting the time of 1 minute and then the rhythm is slow. Click the breathing icon to start breathing training. Breathing training helps to reduce stress and improve vital capacity.
Note: Please maintain the correct posture when measuring, the measurement result is for reference only, can not be used as medical data.

7. Blood Oxygen Monitor
Once you tap on the blood oxygen function interface, the blood oxygen will be automatically measured after 2 seconds. The test data will be displayed when the measurement is completed. The blood oxygen monitoring data can be synchronized and viewed on the App.
Note: Please maintain the correct posture when measuring. The measurement results are for reference only and can not be used as medical data.

8. Weather Forecast
Current day's weather information and the next day's weather information can be displayed on the interface.
Note: To display the weather information, the smartwatch needs to be connected to the App on your mobile phone.

9. Music Control
Connect the watch with your mobile phone through the App. Manually open the mobile phone music player. You have the option to change tracks and also, pause/play the track on the watch.

10. Camera Control
When the App is connected to your Android mobile phone, you can directly tap the remote camera function on the App to automatically turn on the camera. The iOS system phone needs to manually turn on the camera, then tap the camera button on the watch to shoot or shake it (shake the arm) to take a photo.

Connecting with your Device

1. App Download
- Scan the QR code given on the user manual.
- Download and install the app on the phone. (Supports iOS 9.0 & above, Android 4.4 & above. It does not support all mobile device models).

2. Connect Smartwatch
- Switch On the Smartwatch and open the YFit app on your device.
- Please ensure that the watch is not connected to other devices, and turn on the phone's Bluetooth and location service.
- Go to 'Device Tab' at the bottom of the app and click on "Add Device". Select Verve from the device searching screen in the YFit app.
- Your device should now be connected to the smartwatch. You'll be able to see the same on the top of the 'Device Tab' in the Yfit app.

How to Charge
- Use the charger to connect the metal contacts on the back of the watch.
- Connect the other end of charger to USB Charging Dock or to your computer.
- It takes upto 2 hours to completely charge the Smart Watch.

Reconnect the Smart Watch
- Each time you open the App, the watch will automatically connect to the phone. Make sure that the bluetooth has been enabled on your device.

Common Problems and Solutions
▶ Why can't the watch receive the push messages?
- Set YFit (App) to start automatically in the background of the phone.
- Confirm that the message push switch is enabled on the mobile App.

Accessories List
1 x TAGG VERVE Smart Watch
1 x Charger
1 x User Manual

Safety Rules
- The watch should be kept away from fire as it might cause an explosion. The battery life varies according to the environment and usage mode.
- This product is not a medical device. The watch and its application should not be used for diagnosis, treatment, or prevention of diseases.
